

# WATER·TITE

# Rain & Repair Pipe Collar

- Can be used to repair the elastomer sealing collar on all types of residential "No Caulk" roof vent flashings quick and easy
- Eliminates the need for a mastic or caulking type messy repair job
- Can be used to instantly repair a leak during a wet period, until the flashing can be replaced at a later time
- Large size covers the entire existing elastomer collar
- Fully tested for Ultraviolet, Ozone and Weather Resistance
- Individual Sizes and Multi-Size adjustable models available
- Better appearance than a mastic repair job, which means a more satisfied customer

- These separate collars are an option, if a damaged installed residential roof flashing is reported by a homeowner or apartment maintenance person.
- These collars will allow the roofer / repair person to quickly repair the elastomer collar during a wet or leaking situation without the need of bulky mastics or caulking.
- All that is required is establishing the correct pipe size, installing the Rain & Repair collar and you're done (in most cases).
- The collar will allow the option of coming back at a later time to replace the entire flashing or evaluating the situation at a dryer time. In most cases, the Rain & Replacement collar will repair the problem without the need to replace the entire flashing.
